HBC 10 basic

/// Data Sheet

The HBC 10 basic heated bath circulator heats up to a max. temperature of 250 °C. It has a high quality stainless steel bath with a volume of 7.5 – 10.5 liters. The large surface of the radiator allows for an optimum heat exchange and a gentle heating process of the medium. The superior insulation allows for a remarkably fast heat-up time. The easy to clean bath has a front drain valve for safe emptying. In order to drain the system, a hose is connected so there is no direct contact with the tempering fluid. With customer safety as our highest priority, the HBC 10 basic conforms to the highest safety classification III (FL) for use with flammable liquids according to DIN 12876.
